Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 112

Claims 19 and 20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 19 and 20 have positive recitations the building. However, the building has not been positively recited. Consequently, it is unclear if Applicant is actually claiming the combination of the fabric and the building.

Specification

The use of the trademark Velcro™ has been noted in this application. It should be capitalized wherever it appears and be accompanied by the generic terminology.

Although the use of trademarks is permissible in patent applications, the proprietary nature of the marks should be respected and every effort made to prevent their use in any manner which might adversely affect their validity as trademarks.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 13,14 and 17-20 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Bussert.

See fabric (column 2, line 58) 16, and hook and loop fasteners 30,32. The fabric is decorative, column 2, lines 62-64.

Regarding claim 18, Bussert provides a curtain with the term "external" constituting an indication of intended use which is not given weight. Regarding claims 19 and 20, since the building is not positively recited, these claims are not limiting.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 15 and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bussert.

Bussert discloses in column 2, lines 62-64, that various different designs may be used. It would have been obvious to replace an existing banner, curtain, etc., with a different design to match a change in décor.

Claims 1-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hillstrom in view of Phillips.

Hillstrom discloses a banner attached to the exterior of a building, the banner being made of "any appropriate material", which clearly includes a fabric. The banner is removably attached so that it can be changed easily, column 2 lined 29-33. It is attached to an eave at the roof line of a fast food restaurant. What is not shown are the hook and loop fasteners. However, hook and loop fasteners for mounting sheets of decorative fabric is well known, as illustrated by Phillips at 18,20,22,28. It would have been obvious to replace the mounting means of Hillstrom with that of Phillips so as to

render changing of the banner easier. The strip 18 is sewn to the fabric, column 2, line 58, and it would have been obvious to attach the other portion of the hook and loop fastener to support 24 via adhesive since such does not require mechanical fasteners as well as provides a continuous connection. The size of the hook and loop strip is clearly an obvious design choice depending on the size of the banner.

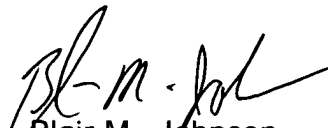

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
